District 6

COUNTY HIGHWAY UPDATE

Since the Montebello Road Bridge was closed due to serious damage caused by Hurricane Irene, I have been working to move the project to replace the bridge forward as expeditiously as possible.

I am pleased to inform you that construction on the new bridge is almost at an end! The utility lines are being installed, and the stonework around the bridge is being completed. Finally, they are putting up the bridge decking and the guide rails.

The Highway Department estimates that the project will be completed by the end of September. Thank you for your patience, and please feel free to call me anytime with questions or concerns.
