**Reason for Referral:**

Village of Kaser, Route 306

The County of Rockland Department of Planning has reviewed the above item. Acting under the terms of the above GML powers and those vested by the County of Rockland Charter, I, the Commissioner of Planning, hereby:

***\*Recommend the following modifications***

1 The Village of Kaser is one of the reasons this proposal was referred to this department for review. The municipal boundary is 190 feet southeast of the site. New York State General Municipal Law states that the purposes of Sections 239-l, 239-m and 239-n shall be to bring pertinent inter-community and countywide planning, zoning, site plan and subdivision considerations to the attention of neighboring municipalities and agencies having jurisdiction. Such review may include inter-community and county-wide considerations in respect to the compatibility of various land uses with one another; traffic generating characteristics of various land uses in relation to the effect of such traffic on other land uses and to the adequacy of existing and proposed thoroughfare facilities; and the protection of community character as regards predominant land uses, population density, and the relation between residential and nonresidential areas. In addition, Section 239-nn was enacted to encourage the coordination of land use development and regulation among adjacent municipalities, and as a result development occurs in a manner that is supportive of the goals and objectives of the general area.

The Village of Kaser must be given the opportunity to review the proposal and its impact on

**ONE CARLTON REALTY, LLC. (R-2414)**

community character, traffic, water quantity and quality, drainage, stormwater runoff and sanitary sewer service. The areas of countywide concern noted above that directly impact the Village of Kaser must be considered and satisfactorily addressed, as well as any additional concerns about the proposal.

2 Permitting development that does not comply with the applicable bulk standards can set an undesirable land use precedent and result in the overutilization of individual sites. The ability of the existing infrastructure to accommodate increased residential density on non-conforming lots is a countywide concern and must be evaluated. This evaluation must consider whether local roads will become more congested and the sewer system, stormwater management systems and the public water supply will be overburdened. The Town must consider the cumulative and regional impacts of permitting such development.

3 The proposed residential building must comply with all requirements of the New York State Uniform Fire Prevention and Building Code.

4 It will not be possible for sanitation workers to access the dumpster enclosure if vehicles are parked in space #4. The dumpster enclosure must be moved to a more accessible location.

5 The bulk table shall include asterisks and a footnote indicating what variances are required for this proposal.
