Re: GENERAL MUNICIPAL LAW REVIEW: Section 239 L and M

Map Date: 1/14/2016

Date Review Received: 4/8/2016

Item: *BARBARA SCHWIMMER (R-2559)*

Variations for front setback, front yard, side setback, rear setback, maximum development coverage and deck rear setback to permit the construction, maintenance and use of a three-family residence with three accessory apartments of .3633 acres in an R-15C zoning district.

Northwest corner of Elish Parkway and Neil Road

Reason for Referral:

Village of Spring Valley

The County of Rockland Department of Planning has reviewed the above item. Acting under the terms of the above GML powers and those vested by the County of Rockland Charter, I, the Commissioner of Planning, hereby:

****Recommend the following modifications***

1 The Village of Spring Valley is the reason this proposal was referred to this department for review. The municipal boundary is approximately 185 feet northwest and 225 feet east of the site. New York State General Municipal Law states that the purposes of Sections 239-l, 239-m and 239-n shall be to bring pertinent inter-community and countywide planning, zoning, site plan and subdivision considerations to the attention of neighboring municipalities and agencies having jurisdiction. Such review may include inter-community and county-wide considerations in respect to the compatibility of various land uses with one another; traffic generating characteristics of various land uses in relation to the effect of such traffic on other land uses and to the adequacy of existing and proposed thoroughfare facilities; and the protection of community character as regards predominant land uses, population density, and the relation between residential and nonresidential areas. In addition, Section 239-nn was enacted to encourage the coordination of land use development and regulation among adjacent municipalities, and as a result development occurs in a manner that is supportive of the goals and objectives of the general area.

The Village of Spring Valley must be given the opportunity to review the proposal and its impact on community character, traffic, water quantity and quality, drainage, stormwater runoff and sanitary

BARBARA SCHWIMMER (R-2559)

sewer service. The areas of countywide concern noted above that directly impact the Village of Spring Valley must be considered and satisfactorily addressed, as well as any additional concerns about the proposal.

2 Permitting development that does not comply with the applicable bulk standards can set an undesirable land use precedent and result in the overutilization of individual sites. The applicant is seeking a 40 percent increase over the maximum permitted development coverage, as well as yard and setback variances. The ability of the existing infrastructure to accommodate increased residential density is a countywide concern and must be evaluated. This evaluation must consider whether local roads will become more congested and the sewer system, stormwater management systems and the public water supply will be overburdened. The Town must consider the cumulative and regional impacts of permitting such development.

3 The proposed residential building must comply with all requirements of the New York State Uniform Fire Prevention and Building Code.

4 The Town of Ramapo Building, Planning & Zoning Department's March 1, 2016 denial letter contains comments from the Fire Inspector that must be addressed. These include: 1) sprinklers must comply with NFPA 13R; 2) the applicant must show that there is sufficient water to meet fire flow requirements as per NYS Fire Code 508.3; 3) if a portion of the building exceeds 30 feet in height above the lowest level of department access, an aerial apparatus road will be required to comply with NYS Fire Code D105; 4) decks, ramps and stairways are not permitted within 10 feet of the property line as per NYS Fire Code 1024.3; 5) fire department connections must be mounted on the street side of the building; 6) the fire alarm must be connected to 44 Control; and 7) the location of the nearest fire hydrant must be shown.

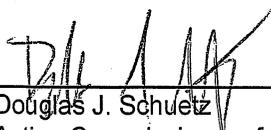

5 A review must be completed by the County of Rockland Office of Fire and Emergency Services or the local fire district to ensure that there is sufficient maneuverability on-site for emergency vehicles.

6 It will be difficult for vehicles parked in spaces 1 and 4 to maneuver in to and out of these spaces without a parking turnaround area. No sidewalks, stairs, or exits have been shown on the site plan, making it difficult to assess the parking area in relation to the pedestrian movement on site, and whether there will be safety issues for the residents. A turnaround area must be provided so that vehicles do not have to back out into the roadway, and the stairs, walkways, and exits must be illustrated on the site plan so that safety issues can be properly evaluated.

7 In addition to providing the location of the exits, walkways and stairs, as mentioned above, the actual building height must be specified in the bulk table.

8 A dumpster enclosure must be shown on the site plan, and be easily accessible to sanitation workers. Parked vehicles must not block access to the dumpster.

9 The site plan must include map notes.

**NYS General Municipal Law Section 239 requires a vote of a 'majority plus one' of your agency to act contrary to the above findings.*

The review undertaken by the Rockland County Planning Department is pursuant to, and follows the mandates of Article 12-B of the New York General Municipal Law. Under Article 12-B the County of Rockland does not render opinions, nor does it make determinations, whether the item reviewed implicates the Religious Land Use and Institutionalized Persons Act. The Rockland County Planning Department defers to the municipality forwarding the item reviewed to render such opinions and make such determinations if appropriate under the circumstances.

In this respect, municipalities are advised that under the Religious Land Use and Institutionalized Persons Act, the preemptive force of any provision of the Act may be avoided (1) by changing a policy or practice that may result in a substantial burden on religious exercise, (2) by retaining a policy or practice and exempting the substantially burdened religious exercise, (3) by providing exemptions from a policy or practice for applications that substantially burden religious exercise, or (4) by any other means that eliminates the substantial burden.

Proponents of projects are advised to apply for variances, special permits or exceptions, hardship approval or other relief.

Pursuant to New York State General Municipal Law §239-m(6), the referring body shall file a report of final action it has taken with the Rockland County Department of Planning within thirty (30) days after final action. A referring body which acts contrary to a recommendation of modification or disapproval of a proposed action shall set forth the reasons for the contrary action in such report.
